

## BSB TELEHANDLER CONCRETE SKIP

The Secatol BSB with a capacity of 500 litres is the ideal skip for use on building sites with a Telehandler. The low overall height of just 730mm enables the skip to be filled from a site concrete mixer.

2 way fork pockets with a safety locking system are fitted as standard, whilst emptying is by means of a lever operated gate which allows small amounts of concrete to be discharged. The base of the skip has a 10 degree slope to assist with discharging the concrete.

Safety locking system

### COLUMN POURING MODEL

A version of the BSB 500l is available with an attachment to allow for the fitting of a 200 mm DIA rubber discharge hose. This detachable attachment enables the BSB to pour concrete through narrow shutters or columns.

Model	Capacity	Length	Width	Height	Fork centres	Net weight
BSB 500	500 litres	1042mm	1110mm	730mm	540mm	165kg
