SM VACUUM STONE MAGNET

Handy, powerful and cordless vacuum lifting device for laying of dense stone slabs, concrete elements, pipes and similar. Can be used on all kind of lifting equipment and is specially designed and equipped for heavy duty work on the construction site. For special purposes, there are different suction plates available, which can be attached to the SM easily.

Robust and compact main body, with integrated suspension for crane hook and quick change device for the suction plate. Powered by rechargeable, exchangeable 12 V battery. Power saving control system makes battery lasting for one whole working day. Battery can be exchanged within seconds. Battery charge indicator.

Security Features: Flashing light to warn on insufficient low pressure, automatic control system to start the vacuum pump after loss of pressure, manometer, high volume vacuum storage tank.

A range of interchangeable suction plates are available to suit many applications.

The SM is equipped with 2 vacuum-pumps as standard. When handling dense products, only one pump is used. On slightly porous material, or when quick cycle time is required, the second pump can be switched on by the TURBO switch.

Basic Unit					
Type	Length (mm)	Width (mm)	Height (mm)	Carrying Capacity (kg)	Unladen Weight (kg)
SM Basic Unit	510	250	580	400	38
Accessories					
HB2 Kerb Plate	900	95		80	
Sprayed Kerb Plate	510	140		70	
200kg Plate	580	280		200	
400kg Plate	750	270		400
