

The Platform provides a safe method of working at height for 2 persons when fitted to a forklift truck.

The forks are located into pockets which have extending lugs allowing safety lock pins to be secured behind the fork heel.

The Platform is fitted with 2 harness points and the use of a safety harness and lanyard is recommended at all times.

Entry and exit from the platform is by means of a lift up bar.

Note:- This item is a non-integrated Platform as described in the Health & Safety Executive Guidance Note PM 28 (fourth edition) and as such does not come under the Machinery Directive or have CE marking. It should only be for occasional use that would otherwise be carried out using less safe means of access such as ladders.

Capacity at 500mm load centre	Dimensions in mm					Centre of gravity
	Length	Width	Height	Max fork size	Fork spread
