UPRIGHT CONCRETE SKIP with bale arm

Presentation: This column skip is designed to enable concrete to be poured into narrow shuttering or columns.

Means of handling: This skip is lifted by its bale arm.

Gate type: This type of skip can be fitted with all the SECATOL mechanisms (TU, TI or TE).

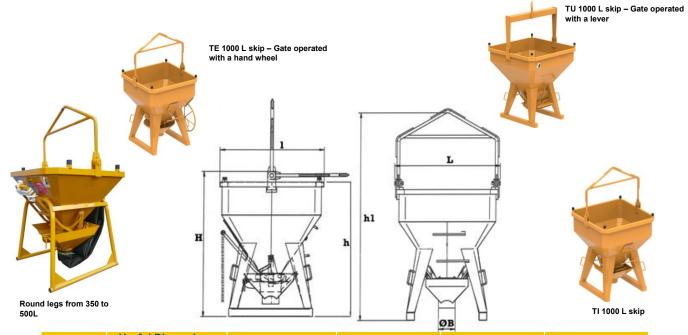

Discharge type: Centre

Gate operation: By means of a nylon rope attached to a spring return lever for the TI and TU gates and by a wheel for the TE gate.

Skips with capacities of 1000 L and above are fitted with the auxiliary gate closing option to ease the gate closure.

Characteristics:

- Skip body reinforcing frame made from channel for greater strength.
- Delivered with a 3 metre long hose, Ø 200mm (as option Ø 90, 150 or 250 mm available).

| Capacity* (in Litres) | Useful Dimensions (in mm) | | | Overall size (in mm) | | | TI | | TU | | TE | |
|--------------------------|------------------------------|------|------|----------------------|------|------|--------------|-------------------|--------------|-------------------|--------------|----------------|
