

The Whitney WSP Snow Plough Attachment converts your forklift into a snow clearing machine. This attachment will help to keep your site or depot working even during heavy snow falls, clearing snow to the left. This plough is simple to fit to any forklift.

The WSP comes in a range of four blade widths and is constructed from 5mm steel. The fork pockets are strengthened to prevent wear and are complete with locking bolts to secure the plough to the forks.

The blade is fitted with a rubber wear strip and is strengthened with a 10mm steel reinforcing plate. The wear strip can be easily replaced when worn.

Dimensions				
Type	Blade width	Fork pocket dims	Fork spread	Weight
WSP1250	1250mm	170mm x 80mm	740mm	105kg
WSP1500	1500mm	170mm x 80mm	740mm	118kg
WSP1830	1830mm	170mm x 80mm	740mm	130kg
WSP2130	2130mm	170mm x 80mm	740mm	165kg
