

The **FL250** Plastic Mortar Tub is a robust tub specifically for use with a forklift or telehandler.

The design ensures rigidity under load and the tapered sides make for easy emptying, cleaning and stacking.

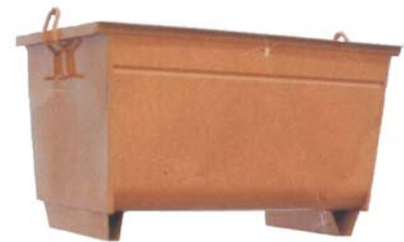

The **Versatile 250** Plastic Mortar Tub is fully certified for use with both crane and forklift and is Weights and Measures approved to ensure 250 litre capacity.

It is manufactured from durable poly-ethylene and has a painted tubular frame with bottom entry fork facility.

The **BAM 330** Steel Mortar Tub is designed for the storage and distribution of mortar around the building site by either crane or telehandler.

The tub is light to handle weighing only 40kgs yet robust in construction. It has a 250 capacity fill line which is clearly visible, is easy to clean and is stackable when empty.
